

CONVEYORS

Modern manufacturing and distribution methods place great emphasis on the safe, quick and reliable movement of component parts and finished goods within production and warehousing environments. In responding to this, conveyor manufacturers are constantly having to refine existing products as well as developing new ones.

Sections and Tubes has the capacity and experience, with tooling in place, to produce a variety of track sections for the conveyor market.

Standard sections are manufactured from HR Dry, HRPO, Pre Galvanised materials. However alternative specific material requirements may be supplied subject to their suitability and availability.

Typical sections include the following, Top Hats, Open Joint Tube, Heavy Duty Angle, Off Set Open Box, Light and Heavy Duty Open Box Sections.

- Variety of Standard Sections • Able to produce Bespoke sections
- Various material Specifications • A wealth of Experience

Your particular application may call for the development of a bespoke product and Sections and Tubes can call on a wealth of experience to achieve a satisfactory conclusion further enhancing the Company's reputation for service, quality and technical back up.
