

INDUSTRIAL DOORS

In recent years the tremendous growth in the fields of warehousing, distribution and logistics has seen an equal rise in the demand for powered roller shutter and sliding folding industrial doors. The large access areas achieved by these doors is further supplemented by their additional benefits of security, fire protection and thermal insulation.

Sections and Tubes has for many years provided a comprehensive range of sections for Industrial Doors from roller shutter lath to sliding or folding door leaf and all related sections.

Roller shutter lath can be produced in gauges 0.7mm (22swg), 0.9mm (20swg), 1.2mm (18swg) and 1.5mm (16swg) in galvanised material or 0.7mm (22swg) & 0.9mm (20swg) in plastisol colour coated material.

Laths can be produced in stock lengths or cut to size as per your requirements.

We also offer from stock (8m. lengths) Guide Channels and Angles in Galvanised & HR material.

Full Tee Bottom Rail (1.5mm & 2.0mm gauges) L Bottom Rail both in galvanised material.

- Galvanised & Plastisol coated material
- Gauges from 0.7mm to 1.5mm
- Stock & cut lengths
- Related sections

Sliding Folding Door Sections include Leaf 152mm (6") 228mm (9") 305mm (12") plain or ribbed in gauges of 1.2mm & 1.5mm which can be produced in stock lengths of your choice or cut to size at the time of rolling.

Other sections for sliding folding doors include Front Hinge, Back Hinge and End Hinge, Lattice Bars cut and punched to your requirements. Bottom Track sections in 2mm and 3mm, plus Eurofront sections, are also available.

- 3 Sizes of door leaf plain or ribbed
- 3 Types of hinge (front, back, end)
- Bottom Tracks (2mm & 3mm)
- Cut and punched lattice bar

Your particular application may call for the development of a bespoke product and Sections and Tubes can call on a wealth of experience to achieve a satisfactory conclusion further enhancing the Company's reputation for service, quality and technical back up.
