

GENERAL APPLICATIONS

Cold rolled sections are used for a wide variety of applications, as diverse as Security products, Industrial Doors, Storage and Racking, Conveyors, Industrial Partitioning and many others.

Sections and Tubes has the expertise and capacity to produce a variety of Cold Rolled Profiles in plain or pierced condition, ranging from angles, Channels, Top Hats, Trunking, Capping sections, British Standard Angles and a multitude of various other profiles.

Sections are typically produced from materials such as Mild Steel, HRPO, CR4, Galvanised, Colour Coated material and Stainless Steel in gauges ranging from 0.4mm to 5mm thick.

Aluminium and other non - ferrous materials may also be cold rolled into profiles.

With an in house toolroom facility, Sections and Tubes are able to offer competitive tooling costs whilst utilising their experience and knowledge of many different market sectors.

- Many Standard profiles within range • Piercing Facilities
- Able to produce from a variety of raw materials • Gauges from 0.4mm to 5mm
- In house tool room facilities • Experience in supplying various diverse market sectors

Your particular application may call for the development of a bespoke product and Sections and Tubes can call on a wealth of experience to achieve a satisfactory conclusion further enhancing the Company's reputation for service, quality and technical back up.
