

SECURITY GRILLES

Collapsible security grilles have become increasingly important in the fight against theft and vandalism, offering a more powerful deterrent and physical barrier than alarm systems. To be effective they have to be of a strong and durable construction whilst at the same time being capable of being adapted to a variety of installations.

Sections and Tubes has a range of cold rolled steel sections developed specifically for the collapsible gate/security grille industry.

Gate/Picket Channel which is manufactured in two sizes 16mm (5/8") and 19mm (3/4") from two different gauges, 2.5mm & 3mm in galvanised or HRPO materials. Lattice section is produced in conjunction with picket in sizes of 16mm and 19mm from 2mm thick galvanised material or HRPO material.

Top and Bottom Tracks are manufactured in stock sizes of your choice in galvanised material, also available from Sections and Tubes is the "Anti Jemmy" zed section which is also produced from galvanised material.

• Gate/Picket Channel • Lattice Section • Top & Bottom Tracks • ZED section

Your particular application may call for the development of a bespoke product and Sections and Tubes can call on a wealth of experience to achieve a satisfactory conclusion further enhancing the Company's reputation for service, quality and technical back up.
